The next meeting of the Isle of Wight Sustainable Business Network (**UKSA, Cowes, June 17th, 0930-1200**) will focus on the issue members at the last meeting advised us they most wanted us to focus on: **Waste**. Alongside an overview of the disposal and recycling options available to Island-based businesses, we will be offering through our guest speakers Envirowise practical advice on the avoidance of waste generation through minimisation and design practices. Our hosts and previous Sustainable Business Awards finalists, UKSA, have offered members a site tour to demonstrate some of the practical measures they have in place to deal with their own waste streams. With a practical workshop element to help businesses identify opportunities which could be applied in their own organisation, this event will take delegates through the three stages of the waste hierarchy: reduce, re-use, recycle – all the while emphasising where the business benefits of effective action lie.

Agenda

- Legislation Update – Blake Laphorn
- Reduce and Re-Use: Practical advice for SMEs – Envirowise
- Island Waste Disposal and Recycling Options – Julia Damrow, Biffa
- Case Study – UKSA
- Workshop: Applying Waste Minimisation Strategies to your own Business

The meeting will be followed by networking opportunities.
